

The Sky is the Limit Cards

Preparation of Cards

Cut the index cards in half to create 18 cards. Write one sentence on each card. For older children you may use the expression while for younger children you will want to use the words.

$\begin{array}{l} \text{number} \times \text{number} \\ (\text{number})^2 \\ n^2 \end{array}$	$\begin{array}{l} \text{number} \times \text{number} \times \\ \text{number} \\ (\text{number})^3 \\ n^3 \end{array}$	$\begin{array}{l} \text{number} \times \text{number} - 5 \\ (\text{number})^2 - 5 \\ n^2 - 5 \end{array}$
$\begin{array}{l} 2 \times \text{number} + 1 \\ 2n + 1 \end{array}$	$\begin{array}{l} \text{number} + 5 \\ n + 5 \end{array}$	$\begin{array}{l} 5 \times \text{number} + 2 \\ 5n + 2 \end{array}$
$\begin{array}{l} \text{number} + 10 \\ n + 10 \end{array}$	$\begin{array}{l} \text{number} \times 10 \\ 10n \end{array}$	$\begin{array}{l} 2 \times \text{number} + 10 \\ 2n + 10 \end{array}$
$\begin{array}{l} 2 \times \text{number} - 1 \\ 2n - 1 \end{array}$	$\begin{array}{l} 5 \times \text{number} - 10 \\ 5n - 10 \end{array}$	$\begin{array}{l} 2 \times \text{number} + 2 \times \text{number} \\ 2n + 2n \end{array}$
$\begin{array}{l} \text{number} + 20 \\ n + 20 \end{array}$	$\begin{array}{l} \text{number} + 8 \\ n + 8 \end{array}$	$\begin{array}{l} \text{number} + 3 \\ n + 3 \end{array}$
$\begin{array}{l} 5 \times \text{number} - 2 \\ 5n - 2 \end{array}$	$\begin{array}{l} 10 \times \text{number} - 10 \\ 10n - 10 \end{array}$	$\begin{array}{l} 5 \times \text{number} - 5 \\ 5n - 5 \end{array}$

Note: Variations to the game can be achieved by creating new expressions with your child that are appropriate to what they are learning in school.
