

## Bringing Mathematics Home 1

Use the set of \*NCTM Standards for the grade that matches your child's grade in school.

1. Remembering that your child may not have studied data yet in their classroom, make an informal evaluation of the concepts that your child knows out of the standards. Be careful! This needs to be done in a positive way that is not too threatening for your child. You might organize the list into:

Already Know	Will Be Learning Soon

2. Share some of the vocabulary that was confusing to you and see if your child can help you understand any of it.

3. Record ways that you used data this week. Be ready to share.
